INTENT

Women need help managing their wellness, keeping calm and remaining safe. Many apps focus on one or the other thus creating an inconsistent experience. Our project will utilize web and mobile technology to build a wellness and safety platform with features to manage wellness, keep calm and require safety all in one app.

PROBLEM STATEMENT

Wellness application tend to include a menstrual cycle tracker while safety applications allow users to manually send SOS alerts. However, there is no comprehensive application that keeps women's wellness, calm and safety in mind. There are also instances where a user is unable to manually trigger the SOS feature.

PROJECT OFFERINGS

- **Menstrual Cycle Tracker:** Allows users to log and monitor their cycles seamlessly.
- **Daily Mood Check & Journaling:** Provides tools for emotional tracking, reflection, and mindfulness.
- **AI-Powered Wellness Tips:** Delivers personalized health, lifestyle, and self-care recommendations based on user data.
- **Voice-Activated SOS Feature:** Triggers an emergency response automatically when specific, pre-defined phrases are spoken.
- **Live Location Sharing:** Automatically transmits the user's real-time location to designated emergency contacts during an SOS event.
